

## Economic Overview And Outlook: Mississippi

### JOBS

- Including December, the private sector has gained jobs nationwide for 46 consecutive months.
- In Mississippi, private sector employment fell by 8.8 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 5.8 percent.
- In Mississippi, employees in the manufacturing, construction, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Mississippi have experienced the greatest employment increases: professional and business services; construction; and mining.\*
- As the recovery continues to take hold, service-providing industries are projected to add the most jobs between 2012 and 2022. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and leisure and hospitality sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries.

### EMPLOYMENT

- The unemployment rate in Mississippi was 8.0 percent in December 2013, up 1.9 percentage points from December 2007, but down from its most recent peak of 10.9 percent in February 2010.
- 102,000 residents were counted among the unemployed in Mississippi during December 2013.
- In Mississippi, initial claims for unemployment insurance benefits totaled 10,780 during December, up 13.0 percent from the previous month. Since peaking at 27,319 in December 2008, initial claims for unemployment insurance benefits have declined by 60.5 percent.

## How Does Mississippi Compare To Other States?

Workers across the country were hard hit during the recent recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Mississippi to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Mississippi since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Mississippi.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

### STATE QUICK FACTS

		Mississippi	United States
<b>Unemployment Rates</b> .....	December 2010	10.5%	9.4%
